

Patient Study Invitation - Questionnaire

Your chance to influence the future of head & neck cancer follow-up

What sort of New?..... We need your view!

We would like to invite you to take part in a questionnaire exploring your views on a new method of following up patients after treatment for head and neck cancer. If, after reading this, you would like to take part, please follow the details at the end of this page.

What is this part of the PETNECK 2 study?

The main aim of the PETNECK 2 study is to carry out a high-quality clinical trial comparing the current method of following patients up with a new, patient-led way. To do this we need to collect the opinions of patients and friends and family of patients, to help guide how we should design the study. Getting your opinion is the aim of this part of the PETNECK 2 study.

This study is funded by the National Institute for Health Research (NIHR) under its Programme Grants for Applied Research Programme (project reference NIHR200861). The views expressed are those of the author(s) and not necessarily those of the NIHR or the Department of Health and Social Care.

Who are we looking for?

Patients who have undergone treatment for head and neck cancer are being invited to take part. The aim of the questionnaire is to seek your views about the content and delivery of the new approach to follow up, that we have planned. For further information about the research study, please also refer to the Patient Information Sheet.

What will it involve?

If you are interested in taking part, there are two ways to complete the questionnaire: by paper or online.

If you want to complete it by paper, please print off the questionnaire attached to the email this invitation came with and fill it out.

If you want to complete the survey online, please click on this link:
